Design. Create. Inspire.

Featuring original BASF Super Chrome mastering tape. For the most demanding recording applications, Super Chrome sets the gold standard in Type II performance. Super Chrome combines outstanding output and low distortion providing unmatched musical clarity. Studio Master tape delivers up to 4db more output, and a greater dynamic frequency range (**16hz – 24khz better than a cd's range**) than the other chrome tapes without saturation or distortion when used with the proper recording equipment, such as ours, and settings.
